

**COACHMAN**

**2025 collection**

# Welcome to Coachman

With new models and a whole host of upgrades and improvements to other ranges within our portfolio, the Coachman collection is better than ever.

We've continued to develop our ranges for the new season - including an overhaul of the popular Acadia, which has been re-engineered to reduce weight, and amended layouts in the Laser range. Two new Acadia models plus the addition of the Lusso III complete the Coachman collection for the 2025 season.

^ Scan to find your nearest Coachman dealership.

# Through the years

## 1986

### In the beginning

Coachman Caravans was founded in late 1986, and established a manufacturing plant in Hull, East Yorkshire. After deciding on a name that reflected the quality of the tourers the company wanted to produce, it began to create its first range.

## 1987

### An instant success

Coachman Caravans was forging its path into the market, taking sales from the more established brands. Sales took off and, in 1988, the Coachman line-up expanded with the launch of a new luxury range, the VIP.

## 1994

### A growing range

Coachman continued to develop and enhance the Genius, Mirage and VIP ranges throughout the mid 1990s, using innovative methods including computer aided design systems to improve caravan aesthetics and aerodynamic profiles.

## 2004

### Renewed independence

Coachman extended its factory by 30,000 square feet as part of a £1.5-million development, having purchased three acres of land. It also focused on the quality and design of its tourers, developing a stringent new testing process.

## 2006

### Award winning

A new wider shell for the Laser, Pastiche and VIP was introduced, plus new layouts and enhanced specification across the ranges. The caravan press reaction was overwhelmingly positive, and Coachman picked up a dozen industry awards in two years.

THROUGH THE YEARS 5 - 6

## 2011

### Big design changes

Following years of expansion, investment and development, Coachman began the new decade by planning a major overhaul of its caravan designs. This process began in 2011, with big changes and improvements to the popular Amara range.

## 2014

### The year of innovation

Coachman began working with Bostik, global leaders in adhesive solutions, to utilise the latest adhesives and swap out wood for advanced polyurethane. Caravans became stronger and lighter, whilst virtually eliminating the threat of water ingress.

## 2016

### It's a family thing

A management buy-out, led by the company's MD Elliot Hibbs, ensured that Coachman remains 'in the family'. Elliot took over Coachman from his father, the late Jim Hibbs.

## 2020

### A new look

Coachman was rebranded, with the company using a completely new logo and incorporating a new colour scheme. This striking new brand identity pushed the company forward into a new era of caravanning.

## 2021

### A new era

Coachman Caravans was purchased by KABE AB, a Swedish company which specialises in the production of high-end caravans and motorhomes for the Scandinavian Market. Whilst the company is now under new ownership the company is still managed and run by the previous directors.

## 2024

### Continued growth

Coachman continues to innovate and develop its vehicle ranges, despite a hard-fought and sporadic industry season. New models and upgrades stimulate customer demand and keep the company at the forefront of the industry.

# Only the best

As a matter of course, Coachman uses state of the art tech and top quality materials during caravan construction.

To achieve the best results when our caravans are built, it's important to use the very best available tech and materials. Our entire team also strives to push the boundaries of caravan design, so each and every detail has been carefully thought through.

^ Scan to find your nearest Coachman dealership.

## Alde's wet central heating system

Alde's wet central heating system has been meticulously planned and installed to ensure you always enjoy the optimum temperature throughout your caravan.

The radiant, hydronic central heating offers many benefits:

- It heats every part of the caravan creating a warm and inviting environment
- The glycol heating fluid circulates quietly around your caravan ensuring the least amount of disturbance
- It works off both gas and electric power sources which, can be combined when required
- Low 12V battery consumes a low amount of energy, preserving your battery life
- Pipes and radiators are mounted discreetly behind furniture, optimising available storage

Coachman has a close and established relationship with Alde. Consultation happens at every stage of the design process to ensure the most efficient heat output, ventilation and installation possible.

Coachman caravans are subject to cold chamber testing. During this process your caravan is cold soaked down to -15°C for ten hours. After this the caravan must heat up to 20°C within four hours and running water must be operational to achieve a Grade 3 pass.

## Advanced bonded construction

Our unique techniques ensure you receive one of the safest and most robust caravans on the market today. Every new model has to pass our fastidious and meticulous quality and safety checks.

It benefits from the following:

1. 25mm sandwich construction roof for added strength and insulation
2. Screwless, body coloured, fully bonded awning rail to both sides
3. 25mm aluminium sandwich sidewall construction with polystyrene insulation core
4. 45mm sandwich construction floor with internal bracing for added strength

# A Coachman journey

From first idea to the forecourt, every single Coachman vehicle goes through our tried-and-tested development journey.

Our drawing board designers imagine ergonomic interiors with an intelligent use of space - and our build experts make those ideas reality. Careful processes during manufacturing allow us to produce practical and comfortable vehicles which leverage luxury from the top-quality materials used in our finishes. A Coachman vehicle provides lifestyle, not just leisure.

^ Scan to see more about Coachman's craftsmanship.

## The drawing board

From initial drawing board concept through to the finished Coachman, the influence of our designers is paramount. They put their experience to work, coming up with ergonomically sound interiors where practicality and comfort meet to support everyone's needs.

## The careful build

Expert craftsmen and technicians use their skills to put together high-quality leisure vehicles which continually improve Coachman's standards. Using meticulous techniques and careful processes, all Coachman builds combine practicality and comfort to support every experience.

## The rigorous testing

At each stage of the Coachman production process, skilled technicians check and test all elements of our vehicles to make sure that everything is fitted as it should be. Every new model has to pass our fastidious and meticulous quality and safety checks.

## The thorough inspection

Once a vehicle has been completed, our experts give it a thorough inspection, ensuring that everything on board works just as it should, and that the Coachman quality standards throughout are maintained and exceeded.

# 2025 at a glance

We've developed our existing ranges for 2025 - including exciting new models and a suite of upgrades and improvements.

From the smallest details to complete layout overhauls, each year Coachman provides new season vehicles which exceed consumer expectations and satisfy demand.

We believe that 2025 represents our best offer yet.

## The versatile *ACADIA*

5 MODELS | 2-5 BERTH | 1-2 AXLES

## COACHMAN CARAVAN COMPANY LTD

Amsterdam Road  
Sutton Fields Industrial Estate  
Hull, HU7 0XF  
Email: [info@coachman.co.uk](mailto:info@coachman.co.uk)

[www.coachman.co.uk](http://www.coachman.co.uk)

This brochure has been designed to provide you with basic information prior to making a purchase decision. Please refer to your dealer for additional information before you buy.

Coachman Caravan Company Limited reserves the right to, and does from time to time, alter technical specifications, prices and model ranges as materials, model improvements and conditions demand, therefore can accept no responsibility for discrepancies between these and subsequent models. Household items illustrated in the brochure (e.g. food items and personal effects) have been used to enhance photography and are not supplied with the caravan. Limitations in the printing process may mean colours are not truly represented.

It should be noted that distributors and dealers are not the agents of Coachman Caravan Company Limited and therefore are not authorised to bind the Company by any specific or implied undertaking or representation.

All Coachman models have been certified by the National Caravan Council for compliance with stringent European Standards, British Legislation and industry set Codes of Practice, specifically relating to health and safety issues. The approval process covers the testing and inspection of critical areas of the product from fire safety, weights and dimensions to gas, electrics and ventilation.

Every Coachman caravan carries the 'NCC Approved Caravan' badge. The NCC also conducts unannounced inspections at the Coachman factory to ensure continued compliance. NCC Approval gives you peace of mind that your caravan is legal and safe.

Please note: Touring caravans are designated by the model year. The model year runs from the 1st September to the 31st August.

Thank you to Burton Constable Hall for letting us use their location for photography.
